

Kenneth Quiggins

Software Developer | www.kenscode.dev

👤 Profile

I am a highly motivated software developer focused on solving complex business challenges by delivering scalable, user-friendly interfaces and seamless user experiences. I have a background in React and FullStack frameworks such as NextJS. I love solving complex problems and adding value to the developer community.

★ Projects

Marvel Explorer

- Utilized modern development practices such as RESTful API consumption, state management with React hooks, and Git-based version control.
- Integrated server actions to fetch and manipulate data directly from an external API
- Optimized performance by reducing client side load using server components
- Deployment: [Marvel Explorer](#)
- GitHub Repo: [Marvel Repository](#)

Comic Store

- Developed a fully functional e-commerce platform using Next.js, leveraging server-side rendering and static generation to enhance performance and SEO.
- Integrated third-party APIs to manage product data and payment processing, ensuring a secure and efficient end-to-end shopping experience.
- Implemented dynamic routing and reusable component patterns to create a responsive, scalable user interface for seamless product browsing and checkout experiences.
- Deployment: [Comic Store](#)
- GitHub: [Comic Store Repository](#)

📁 Employment History

Electrician Apprentice at Quiggins Electric, Louisville

January 2015 — April 2020

- Collaborated with licensed electricians in installing, maintaining, and repairing electrical systems in residential, commercial, and industrial settings.
- Performed tasks such as running conduit, pulling wire, installing fixtures, and testing electrical systems.
- Developed skills in troubleshooting and diagnosing electrical issues while building a strong foundation in the trade through on-the-job training.
